

The Significance of the Nexion numeric sequence:

Within the Wamphyric Tradition and more specifically in relation to the traditions of Nythra's Gate as well as our internal order, The Order of The Black Hand, 1313 constitutes the nexion numeric sequence. This sequence of numbers represents externally the branding and 'reputation' of the nexion, giving meaning and a point of reference within discussions to our internal traditions. Esoterically, the number represents the concept of the thirteenth and intercalary month according to the edomite lunisolar calendar as it relates to Ba'al Hadaad of rain, thunder, and storms- lord of the earth gate, father of the nation of Edom, the key unto acceleratory progress through directed chaos operating behind the veil of causal reality.

The lunisolar year of the phonecian and edomic peoples operated in periods of 13 months, in which the intercalary month (13th), related to the absence of the presence of the archetypal god of order, father of our volk, Baal (*Satanas* ~> *Baal*). This season brought on drought, death, and destruction- thus surviving only the strong, those who understood the concept of a force outside of the causal ecosystem, a species of being higher than man. This season curated the population and ravaged the lands of edom, leaving only the powerful volk who were strong enough to survive- those who understood the chaos of non-order and in turn used the chaos directly to their own advantage, to drain the life force of others and thus build a strong foundation for the season proceeding in which Baal would return to restore order.

Within this esoteric framework, 1313 is not just a number of chronology but of disruption of causal current—a doubled threshold. The first *thirteen* marks the break in the natural cycle (the ego temporarily destroyed in the face of chthonic abyssal forces), the intrusion of the intercalary force; the second *thirteen* marks the conscious psychological mastery of that rupture by the initiated current. Thus the nexion presencing the sinister numinous in our causal domain does not merely endure the extra month, but lives within it, establishing continuity where the profane world perceives only absence and decay.

The intercalary month was taken not as void, but as a veiled interval—a period not governed by the visible law of the seasons. Baal's withdrawal was not inherently destruction, but concealment behind the veil of causal order. In this withdrawal, the seasonal mechanisms of fertility collapse, rain ceases, and the land enters a state of physical contraction.

The number 364 is simply a shortened version of 1313, in the context of the second sphere of the thirteenth season, together the three numbers create 13, the acausal gate of a season that will constitute the great Aeon of mankind's Homo Galactica by directed chaos outside of conventional order as instated by the magian, instating a new order seeking to fulfill greater wyrd and cast the hand of our gnosis over the chalice of mind of all men that walk the earth.
